

In this task, It is shown the completed three tasks which are Appium Mobile App Testing, Selenium Web Testing and Jmeter.

In the Jmeter Section, there is a screenshot and a java file which shows how I completed the task. The URL you have provided me does not work except the base URL.

I have checked with a dummy API which gives us a good throughput which is a good response to check the stress and load.

Kfjmx (C:\Users\Will\Desktop\Umeter\apache-jmeter-5.5\apache-jmeter-5.5\bin\Kfjmx) - Apache JMeter (5.5)

In the selenium section, it is testing the web app using selenium webdriver, You can see a testimonial video here, I have used different link because the web app you have given me cannot be accessed without a canada and US Phone number, You can check the use case with video

https://drive.google.com/file/d/1Pf_61EF8gzbyYNo1SYyiGSsNE2RNpEys/view?usp=share_link

In the Appium Section, I have tested whether the given mobile App can complete the required login and start correctly by tapping the introduction menu.
